Gradients and Partial Derivatives - Gradients and Partial Derivatives by Physics Videos by Eugene Khutoryansky 567,356 views 8 years ago 5 minutes, 24 seconds - 3D visualization of partial derivatives and gradient vectors. My Patreon account is at <https://www.patreon.com/EugeneK>.

Suppose that we pick one value for X, and we keep X at this one value as we change the value for Y.

At each point, the change in z divided by the change in Y is given by the slope of this line

Again, at each point, the change in z divided by the change Y is given by the slope of this line.

The change in z divided by the change in Y is what we refer to as the partial derivative of Z with respect to Y.

Every point on the graph has a value for the partial derivative of Z with respect to Y.

Here, green indicates a positive value, and red indicates a negative value.

Every point on the graph also has a value for the partial derivative of Z with respect to X.
